

Apollo Family Check

(The customised health check for your family.)

A comprehensive and extremely personalised health check for you and your family, where we assess the health of every member of the family, identify potential health risks on an individual basis, and provide professional advice and counseling for a happy and healthy life.

A family may be one in every sense of the term, but different family members have different healthcare requirements.

We understand this important fact, which is why we treat your family members as individuals, assessing each one's health and closely examining the potential health risks each one faces, many of which could be manifested over time.

We identify and address these risks, and our solutions potentially reverse problems that may be present.

All this, of course, comes to you and your family in a warm and personal way, and with Apollo's unwavering commitment to provide you with the very best in healthcare.
